Neo-Naro (gift set book + card). – М.: **Veligor" Trading House**,

Author of the project: Olga Dobricyna Designer: Peter Vasilyev

Neo-Tarot is another deck of Tarot cards and a part of the new original project in geomancy (the art of divination), called "Celestial mosaic". This project was developed by a group of Tarot cards readers, philosophers, artists and poets, through their cooperative efforts, who had explored ancient and modern systems of divination for the sake of knowledge of the Truth through the Tarot.

The Neo-Tarot deck has no comparable counterparts either in Russia or in any other country. The distinctiveness of this deck is that it has no human images, so you get the opportunity to actually return to your so often "ruined" inner "I" and revive it. In fact, in the Neo-Tarot, the role of humans is taken on by symbols and images that all readers of Tarot cards know so well, and this does not complicate, but makes it easier to perceive a card and even enhances the energy of these cards.

This deck "breathes" with magical contemplativeness and meditativeness. It really bewitches you with its surreality, but it does this healing you. There is no "personification" in these cards, so for a diviner or a fortune-teller it becomes possible to maximize his or her immersion into this deck, because fate is not personified.

Any deck from this project will be a unique and unforgettable gift to your friends, relatives and loved ones, and will not only delight the eye, but will also be an excellent working tool in practices of divination.

We welcome you!

“Celestial mosaic” is a new original project in geomancy (the art of divination). This project was developed by a group of Tarot cards readers, philosophers, artists and poets, through their cooperative efforts, who had explored ancient and modern systems of divination and knowledge of the Truth through the Tarot.

All the decks of cards that are prepared for publication are unique, inimitable and have no counterparts in either Russia or in any other country. In some decks of this project, the authors adhere to serious traditions, but give them a new dimension, a “second life”. In addition, you will be amazed at the novelty of these ideas, boldness and imagination, which is demonstrated by these decks of cards. The fact is that each of these authors has a very good artistic taste, understands the depth of symbolic images and has a bright energy.

The “Celestial Mosaic” decks are not only the keepers of the keys to the secret knowledge and success, but also the good amulets that will become for you a talisman, a performer of desires or a wise oracle for every day. Tarot cards are inherently a mystical instrument of knowing oneself and the world, identifying ways of interaction and interpenetration. Divination by means of “Celestial mosaic” tarot cards or meditation on them will allow you to develop your logic, intuition, imagination, telepathy and healing abilities. Among other things, you can also use these cards to relax or just to get positive energy and inspiration.

Any deck from this project will be a unique and unforgettable gift to your friends, relatives and loved ones, and will not only delight the eye, but will also be enriching for the soul. Choose a deck that is naturally in harmony with you and inspires you. It will comfort you and become a real prophetess of everything wonderful and bright in your life.

We wish you happiness, robust health and all the best!

INTRODUCTION TO NEO-TAROT

These unusual and mystical Tarot cards can only arise today, at the beginning of the third millennium of the Age of Aquarius. Their creator was also Aquarius. Traditionally, tarot cards always had images or symbols of a person. However now, after the tragic events of the twentieth century and the beginning of the 21st century, every person has become so distanced from himself or herself, from his or her own integrity, that the disintegration of the inner, spiritual “I”, and the discord with the environment (with nature, megacity or society) prevail over our striving for high harmony and communication with nature. The world of things with its craving for material goods does not allow you to feel joy, live life to the fullest and, therefore, to communicate with the microcosm and the macrocosm. That is why now the “Way to Yourself” is not only (and not so much) a fashionable advertising brand of esoteric products, but a fact used for the survival of the human soul, in the human body and in an even more changed, hostile world not similar to the 20th century.

The distinctiveness of this deck is that it has no human images, so you get the opportunity to actually return to your so often “ruined” inner “I” and revive it, to return to your spiritual core and to the cosmos. In fact, in the Neo-Tarot cards, the role of humans is taken on by symbols and images that all readers of Tarot cards know so well, and this does not complicate, but makes it easier to perceive a card and even enhances the energy of these cards.

This deck “breathes” with magical contemplativeness and meditateness. It really bewitches you with its surreality, but it does this healing you. There is no “personification” in these cards, so for a diviner or a fortune-teller it becomes possible to maximize his or her immersion into this deck, because fate is not personified.

The Neo-Tarot cards are multidimensional. They have in themselves a different dimension that becomes the Questioner. These cards are filled with cosmic energy. The designer of this deck unexpectedly abandoned the schematic or kitsch images of people, so common in

cards, and this fact, together with the contemplative surreality of the pictures, gives these cards a sense of airiness, flight and astonishing weightlessness. All this allows you to realize something unknown, enclosed in each of us, in those minutes when you work with these cards. They are a union of the fantastic and the earthly, the real and the transcendental. Symbolic things and landscapes in these cards are spiritual and highly informative. They influence you through their mysterious unknowability, making you crave understanding of the essence and meaning of things, and reminding you that a human is not only a measure of all things, but also a noumenon (according to the philosophical concept of Immanuel Kant). The designer has managed to depict objects that, in spite of their internal contradictory tension, are able to maintain a stable harmonious unity.

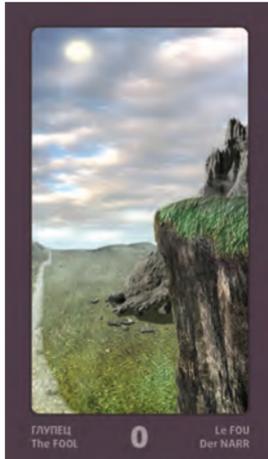

The emotional and visual impact of the Neo-Tarot deck is reminiscent of Andrei Tarkovsky's films, such as *Solaris* and *Stalker*. Therefore, divination with this deck opens a door into a strange and sometimes disturbing but incredibly attractive world where the reader of these cards is a stalker, and his or her client is one who wishes very much to penetrate the mysterious "zone" and to achieve what he or she wishes.

The Neo-Tarot cards that show philosophical and magical symbols in such an original way are sure to appeal to people who have strict aesthetic requirements and look for Truth in an ancient philosophical mirror called Tarot. At the same time, these cards have a classical appearance, so an experienced reader of Tarot cards will be able to recognize them. However, even a beginner can easily read them, because they are abstract to a certain extent. They have tradition and symbolism, combined with the surreality of modern artistic vision and attitude.

Every good deck has its "target audience". There are art films not for the mass audience. Perhaps Neo-Tarot is a kind of such "art-house" deck, but this is the happy distinctiveness of these cards. Let the unpredictability, multidimensionality and surreality of this deck give you true pleasure.

A large tree looks like its support. A fine, sunny (just a little bit cloudy) day bestows you happiness. It seems that The Lovers of Neo-Tarot do not stand still, but float. Fruits mean future passion, family and the joy of knowing “carnal” love and merging, as well as the spiritual unity of the Lovers.

This is the stage of “celestial bliss”, with responsibility of choosing a companion for your life. In this card, there is no traditional reference to Lucifer or the Serpent, Love itself is a good temptation and a test, for lovers are often lonely. This card is interesting in its unification, as if the “Tree of Life” itself is androgynous: two trees, a male one (similar to the Tree of Power) and a female one (similar to the Tree of Desire), stand in an embrace and act as Adam and Eve.
